## **WIRELESS SMOKE DETECTOR SYSTEM**

By  
Aimi Liyana Binti Azlan

Project Report submitted in partial fulfillment of  
the requirements for the award of the degree of  
Bachelor of Applied Science (Physics Electronics & Instrumentation)

**DEPARTMENT OF PHYSICAL SCIENCES  
FACULTY OF SCIENCE AND TECHNOLOGY  
UNIVERSITI MALAYSIA TERENGGANU  
2008**

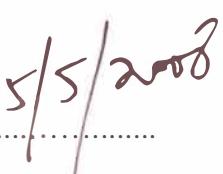

**JABATAN SAINS FIZIK  
FAKULTI SAINS DAN TEKNOLOGI  
UNIVERSITI MALAYSIA TERENGGANU**

**PENGAKUAN DAN PENGESAHAN LAPORAN PITA I DAN II**

Adalah ini diakui dan disahkan bahawa laporan penyelidikan bertajuk : **WIRELESS SMOKE DETECTOR SYSTEM** oleh **AIMI LIYANA BINTI AZLAN**, no. matrik: **UK12470** telah diperiksa dan semua pembetulan yang disarankan telah dilakukan. Laporan ini dikemukakan kepada Jabatan Sains Fizik sebagai memenuhi sebahagian daripada keperluan memperolehi Ijazah Sarjana Muda Sains Gunaan ( Fizik Elektronik & Instrumentasi ) Fakulti Sains dan Teknologi, UMT.

Disahkan oleh:

Penyelia Utama  
Nama: DR. CHAN KOK SHENG  
Cop Rasmi: Pensyarah  
Jabatan Sains Fizik  
Fakulti Sains dan Teknologi  
Universiti Malaysia Terengganu  
21030 Kuala Terengganu

Tarikh: .....

Tarikh: 5 Mei 2008  

## **DECLARATION**

I hereby declare that this thesis entitled Wireless Smoke Detector is the result of my own research except as cited in the references.

Signature	: 
Name	: Aimi Liyana Binti Azlan
Matric No	: UK 12470
Date	: 05 Mei 2008

## **ACKNOWLEDGMENTS**

**Bismillahirrahmanirrahim,**

First of all I would like to thank **Allah S. W. T** for the blessing and the mighty strength given for me to finish my research. Besides gaining the knowledge, many of the things I learn which is useful for my future.

I wish to express my gratitude to my supervisor **Dr Chan Kok Sheng** for the attention given for me. Thank you for the co-operation, commitment and helpness given as long as I run this research.

A millions thanks I dedicated to my co supervisor **Mrs Farizan Binti Munajat** for her neat guide along the experiment done. Her advice, opinions, encouragement and motivation make me strong to do this research until the end. Thank you madam for introduce me to the world name “electronic system”.

I am also gratitude to all lecturers and staff in Department of Physical Sciences, especially **Assoc. Professor Dr. Senin Bin Hassan**. And also thank you to **Ekral Mega Sdn. Bhd.**, Perak.

Beside that, I am also grateful to my father and mother, **Mr. Azlan Bin Alias & Puan Rohani Binti Embong**. Thank for the moral support given. And for my family member’s **Fakhri and Fakhru** thank you for understanding my situation. A very special thank for my best friend, **Muhd Hafifie Bin Muhammad Shukri**. Thank for being around when I am needed. Your support was my inspiration.

My sincere gratitude is also convey to my colleagues **Fadilah Bt Abd Wahab, Naimah Bt Ismail, Norshazlinda Rosli, Nor Azwa, Siti ‘Aishah, Siti Salwa, Aimi Hazwani and Noor Azila Ahmad Zaki (UTEM)**. Thank you very much! And for those person who participates direct or indirectly in finishing my research.

*Aimi Liyana Binti Azlan

## ABSTRACT

Many factors can caused fire occur. Including careless, not concern attitude, strand of metal and electric device damaged. Fire Department have found that electric is a main source which make fire occur. Then, next source is a stump of cigarette and also the fire sprinkle. All the scenes, usually occur at home and office. Consequently, all the material were damaged and the rate of fatal increased. In order to overcoming such problem, a wireless smoke detector system which is can detect a fire occur at the first state was developed. It was very important for the first warning because fire and smoke can disseminate quickly, so the gases produced can make everyone unconscious. With this system, safety action can be taken earlier and the rate of fatal also decreased. The project entails the design and engineering of a wireless smoke detector unit and network. The hardware module includes the PIC (Peripheral Interface Controller) microcontroller, smoke detector, remote control decoder, transceiver and receiver. The software component includes the program and code implemented via the PIC microcontroller. In its completion and entirety, the smoke detector unit properly functions and in the manner it was originally planned and designed.

## **ABSTRAK**

Banyak faktor yang boleh menyumbang berlakunya sesuatu kebakaran. Antaranya ialah kecuaian, sikap tidak ambil tahu, kerosakan pendawaian, dan peralatan elektrik. Jabatan Bomba mendapati elektrik adalah punca utama berlakunya kebakaran, kedua ialah puntung rokok dan ketiga ialah percikan api. Semua kejadian ini biasanya berlaku di premis kediaman dan bangunan-bangunan pejabat. Akibatnya harta benda musnah, dan kadar kematian meningkat. Oleh itu, satu sistem diperlukan untuk mengatasi masalah ini. Sistem tersebut ialah alat pengesan asap yang dapat mengesan kebakaran dari peringkat awal. Sistem pengesan tanpa wayar ini dibina bagi memastikan keselamatan diri dan harta benda lebih terjamin. Amaran awal amat penting kerana api dan asap merebak dengan cepat, gas yang berhasil boleh membuatkan seseorang tidak sedarkan diri dan pengsan. Dengan adanya sistem ini, langkah keselamatan dapat diambil dan mengurangkan kadar kemalangan serta kematian. Projek ini memerlukan reka bentuk dan kejuruteraan daripada unit pengesan asap tanpa wayar dan rangkaianya. Modul peralatan yang digunakan termasuklah mikropengawal, pengesan asap, alat pengawal dekoder, pemancar dan juga penerima. Manakala komponen program perisian termasuklah program dan kod perlaksanaan melalui mikropengawal. Ini adalah pelengkap dan keseluruhannya, alat pengesan asap ini berfungsi dengan betul dengan cara yang dirancang dan direka bentuknya.
