PENGAKUAN DAN PENGESAHAN LAPORAN PENYELIDIKAN SFZ 4399 a/b

Adalah ini diakui dan disahkan bahawa laporan penyelidikan bertajuk: *A STUDY OF SURFACE MORPHOLOGY AND PHYSICAL PROPERTIES OF POLY(VINYL ALCOHOL AND METHYL CELLULOSE (PVA/MC) THIN-FILM*

oleh.....**MOHD KHAIROL BIN MOHD BAHRU**....., no. matrik: **UF14477**.....  
telah diperiksa dan semua pembetulan yang disarankan telah dilakukan. Laporan ini dikemukakan kepada Jabatan Sains Fizik sebagai memenuhi sebahagian daripada keperluan memperolehi Ijazah Sarjana Muda Sains Gunaan (Fizik Elektronik & Instrumentasi), Fakulti Sains dan Teknologi, UMT.

Disahkan oleh:

Penyelia Utama  
Nama: **DR. CHAN KOK SHENG**  
Cop Rasmi:

## **DECLARATION**

I hereby declare that this thesis entitled A Study Of Morphology And Physical Properties Of Polyvinyl Alcohol (PVA) / Methyl Cellulose (Or Methylcellulose) Thin Film is the result of my own research except as cited in the references.

Signature : 

Name : Mohd Khairol Bin Mohd Bakri

Matrix no. : UK14477

Date : 30/4/2009

## **ACKNOWLEDGEMENT**

First of all, I am very grateful and thankful to God for giving me a good health, chance and strength to complete this research work. It took me a very strong determination to finish this thesis and as in returned I gained a lot of knowledge which are very precious.

I am deeply grateful to my charismatic supervisor Dr. Chan Kok Sheng whose help; simulating suggestion and encouragement help me in all the time of research and writing of this thesis. Thank you for being such understanding, encouraging and broadminded during this period time.

I would like to express my thankfulness to all those who gave me the possibility to complete this thesis. I want to thank all the staff in the Department of Physical Science forgiving me permission to commence this thesis, to do the necessary research work and to use the departmental instruments. My sincere gratitude to the master students, Nik Aziz and Santana for helping us during all the period time.

To my fellow friend: Khazimie, Alip and Ernest, thank you very much for all the help and friendship given to me. We share all the memories and experienced together during this wonderful journey in UMT. I hope all the hard works will be paid.

Also not forget, very special gratitude to my parent: Mohd Bakri Che Isa and Rizan Saaid. Without their pray and support, I would not be able to gain knowledge and success now. Thank you for the entire moral and continuous support throughout my education.

Mac 2009

**A STUDY OF SURFACE MORPHOLOGY AND PHYSICAL PROPERTIES OF  
POLYVINYL ALCOHOL AND METHYL CELLULOSE  
(PVA/MC) THIN-FILM.**

**ABSTRACT**

The application of polymer especially polyvinyl alcohol and methyl cellulose (PVA/MC) has generated much interest in various industry. In this research, characterization and properties of (PVA/MC) has been studied by several techniques. For the first method measurements reveal the surface morphology of PVA/MC in a form of powder and thin film. The image of the both PVA/MC surface has been carried out by Scanning Electron Microscope (SEM). Infrared detector was used to demonstrate the structure of PVA/MC. The result showed the bond group of PVA/MC in range between  $500\text{ cm}^{-1}$  to  $4000\text{ cm}^{-1}$ . The EIS was conducted in order to determine the conductivity of the PVA/MC sample. The conductivity of the samole found to be between  $1.035 \times 10^{-5}$  to  $9 \times 10^{-6}\text{ scm}^{-1}$ .

**KAJIAN BENTUK PERMUKAAN DAN FIZIKAL FILEM NIPIS KEATAS  
POLYVINYL ALCOHOL DAN METHYL CELLULOSE  
(PVA/MC)**

**ABSTRAK**

Aplikasi penggunaan polimer terutamanya polyvinyl alcohol dan methyl cellulose (PVA/MC) telah mencetuskan minat dalam pelbagai industri. Kajian ini telah dilakukan bagi mengetahui sifat serta ciri-ciri bagi PVA/MC dengan menggunakan beberapa kaedah. Kaedah pertama yang digunakan telah mendedahkan morfologi permukaan bagi PVA/MC dalam bentuk filem nipis. Mikroskop Pengimbasan Elektron telah menghasilkan imej permukaan kedua-dua jenis PVA/MC. Pengesan inframerah telah digunakan bagi menunjukkan struktur PVA/MC. Keputusan bagi kumpulan ikatan PVA/MC adalah di dalam skala di antara  $500\text{ cm}^{-1}$  hingga  $4000\text{ cm}^{-1}$ . Ujian kerintangan/pengaliran arus mengikut contoh sampel PVA/MC dan keputusan untuk ujian kerintangan/pengaliran menggunakan EIS adalah di sekitar  $1.035 \times 10^{-5}$  hingga  $9 \times 10^{-6}\text{ scm}^{-1}$ .
