To my beloved parents :

Md Mansor Bin Abd Ghafur

and

Asma Binti Hj Ismail

&

my loving sisters :

Munirah Mansor and Mardhiah Mansor

For their huge supports, encouragements and guidances

ABSTRACT

Malaysia is one of the maritime nation. Strategic location of the country in the middle of sea route between west and east give us huge benefit to venture and involved in Maritime Industry. Thus, it requires high demand in sefaring career. Therefore, in Kuala Terengganu the response from youth regarding this career is still less. The objectives of this research are to determine the level of exposure about seafaring careeer among youth in Kuala Terengganu and to identify the reasons why they are not exposing to the career. This research also is conducted as to recommend the ways for improving the exposure of seafaring career to the youth. The primary resources were obtained through the methods of questionnaires that have been given to the secondary school students among form 4 and form 5 students. Interview session is conducted with the counselor of each school or any qualified person from the schools regarding the exposure of seafaring career among youth in Kuala Terengganu. The answers given from them also categorized as a primary resource. Then, the secondary resources were obtained from the articles, journal, newspapers and texts related to the research. Those data obtained is analyzed to meet the objectives.

ABSTRAK

Malaysia adalah sebuah negara maritim. Kedudukan yang strategik di tengah laluan laut di antara barat dan timur memberi kelebihan besar kepada negara ini untuk mengusahakan dan melibatkan diri dalam industri maritim. Oleh itu, ia memerlukan permintaan yang tinggi dalam kerjaya pelaut. Namun begitu, di Kuala Terengganu, sambutan dari kalangan remaja mengenai kerjaya pelaut masih kurang. Objektif kajian ini adalah untuk menentukan tahap pendedahan remaja mengenai kerjaya pelaut di Kuala Terengganu dan mengenal pasti sebab mereka tidak terdedah kepada kerjaya tersebut. Kajian ini juga dijalankan untuk memberi cadangan dalam meningkatkan pendedahan kerjaya pelaut kepada remaja. Sumber utama kajian ini diambil melalui kaedah soal selidik yang diberikan kepada pelajar sekolah menengah dikalangan pelajar tingkatan 4 dan tingkatan 5. Sesi interview dijalankan dengan guru kaunseling atau seseorang yang berkelayakan dari sekolah tersebut tentang pendedahan kerjaya pelaut di kalangan remaja di Kuala Terengganu. Jawapan yang diberikan oleh mereka dikategorikan sebagai sumber utama. Kemudian, sumber-sumber sekunder diperolehi daripada artikel, jurnal, surat khabar dan teks mengenai kajian. Kesemua maklumat yang diperoleh dianalisis untuk mencapai objektif.
